THE MARKETS.

Wall Street Review.

New York, June 5.- The strength of the stock market, which was quite marked at one time during the day, diminished decidedly after a When the check was first decisively es tablished there was a notable falling away in the volume of dealings, but there was a resump-tion of activity before the close, this time on the selling side, and the closing was decidedly weak with some wide breaches effected in places. The progressive decline in the strength of the market is probably due to the completion of realizing profits in various heavy lines of stock This profit taking was clearly in evidence al day, every demonstration of special strength in individual stocks being taken advantage of to prosecute the selling elsewhere. Stocks which have shown the greatest strength recently, were naturally mest affected by the realizing. The cant low prices, stocks, during the earlier part of the day, pointed clearly to manipulation in the interest of the realizing process, but there were also many notable points of strength developed in the market in high grade stocks. The most sensational unward movement was in Rock Island. The late sport in that stock to 175% had a momentary influence in stiffening the list after it had touched the low points of the day to that time, but as soon as it was perceived that the Rock Island movement was with-out effect the selling was renewed with redoubled force. The movement in Atchison was more gradual and on larger dealings. Rumors of a lease to Union Pacific persisted and the admis-sion to the directory of a member of the bank-ing form which represents the northern lines of Pacific railroads was regarded as significant of the progress being made toward community of interest in that territory as a result of the son's extreme rise was 414. The strength of Plinois Central was based on comparison of its low prices with other railroad stocks in the same category. Total sales today, 1,418,200
